SHARED DISH (SD)

SD provides a single small satellite dish, usually fixed on the roof and out of sight. The signals are distributed by special head-end equipment that requires no mains power supply of its own, and can be located near the dish without the need for extra electrical works. The cabling to each flat connected is routed externally, so there is minimum upheaval for other residents. The only cost you will incur is the outlay for the electrical earth bonding of the equipment, which must (by law) be carried out or certified by a qualified electrician.

The location of all the equipment is agreed with you or your property manager at the time of the survey, and in most cases this is the extent of your involvement with the process. You just leave Custom MDU to look after all the organisation and administration associated with your system.

SD is designed to cater for all the flats in a property and, once the system is up and running with the initial flats connected, additional connections can easily be made when more of your residents choose to subscribe to Sky TV. Every connection is Sky+ ready, so all your residents can take advantage of the revolutionary Sky+ integrated digital recorder and satellite receiver.

Shared Dish — Five Easy Steps

1. Apply for SD and get the building surveyed for suitability.
2. A specialist team works with you and the residents to sign up a minimum of 25% of the block (subject to a minimum of 4) to subscribe to Sky TV.
3. Electrical earth bonding is undertaken and certified by a qualified electrician (a legal requirement and the only charge you incur).
4. SD dish and head-end installed by Custom MDU Sky Homes accredited contractor.
5. Your residents are connected to Sky TV.

Shared Dish — what's in it for you

- Easy solution to going digital.
- Prepares for the analogue switch-off.
- Satisfies residents' demands for digital services.
- Enhancement to the property.
- Add value for potential new residents.

Please contact Custom MDU with your inquiry and we will contact you to discuss your plans. If you require more information please contact us or ring on 08709 950 839
